

# **CREATING A PRIMARY SCHOOL LAB**

Marina Ruano Garau

October 2021

WHO AM I?

170  
teachers

2021  
students

Garbí Pere  
Vergés

2 Schools (3-18)

Highschool maths'  
teacher

Pedagogical team member

In charge of Maths,  
Science and Technology

WHY IS IT IMPORTANT FOR YOU LISTENING TO ME?

The best way of learning  
science is making science

WHO WILL BENEFIT FROM MY POLICY?

## WHAT WILL THE IMPACT BE?

22

- More ways of teaching
- Training on making school science

300

- Learning by doing
- Direct application of scientific method

HOW MUCH WILL IT COST?

**21.500€**

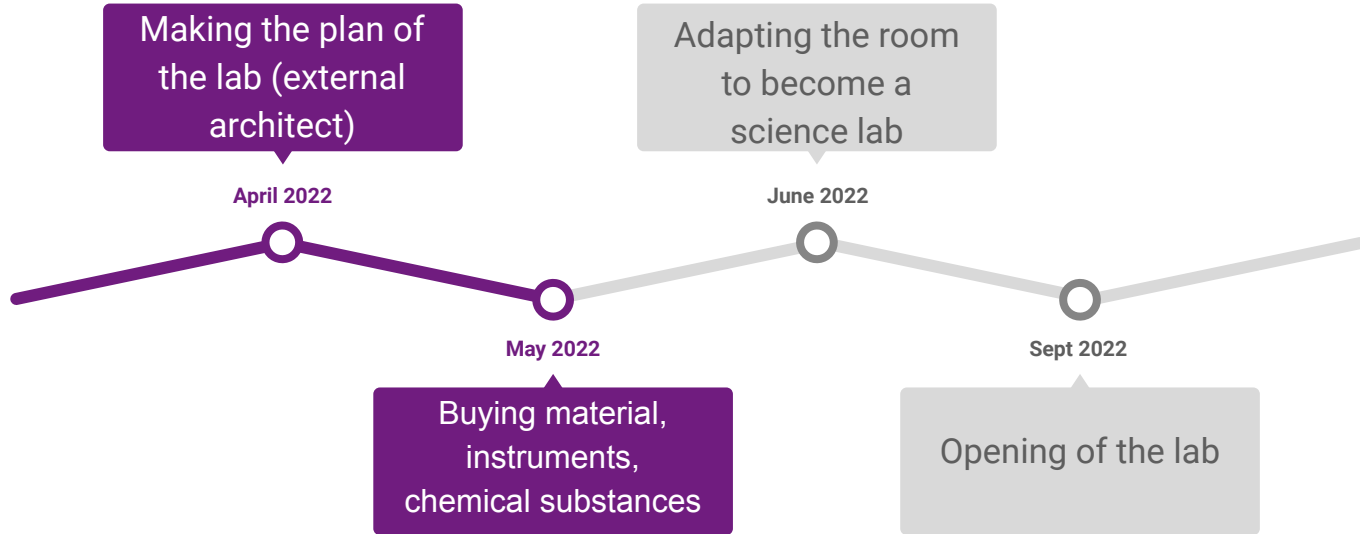

**3.500€**  
**Material**

**10.000€**  
**Construction**

**8.000€**  
**Architect  
Trainers**

# HOW MUCH TIME WILL IT TAKE?

NOT TO SHOW.  
JUST TO HAVE IN  
MIND

## WHAT'S THE PLAN TO OVERCOME SHOW-STOPPERS?

### Potential **show-stoppers**:

- Other schools with similar aims, and depending on the same funds → let's share them! If we are depend on the same funds, we'll probably be close to each other. So we can share the space.
- Other teachers of the school against the lost of the space that is gonna be the lab.

### Potential **distractions** that might delay:

- The plan of the lab → contacting a reliable architect.
- Problems with the provision of the material → make it with enough time.
