

# School Vocational Orientation through STE(A)M

---

Dalaka Mersini

Computer Science Teacher

2nd Junior High School of Thebes - Pindario

5th Junior High School of Thebes - Pelopideio

# Who am I?

---

Hello!

My name is Mersini Dalaka.

I am a Computer Science teacher in two high schools of Thebes, Greece.

I teach 300 students and cooperate with 30 teachers.

## Why is it important for you listening to me?

---

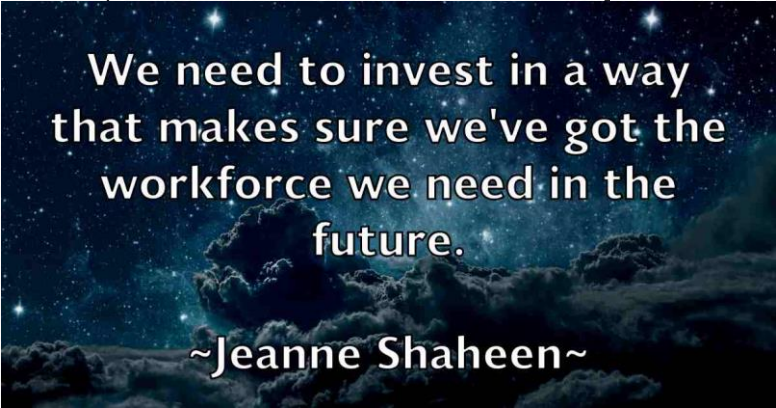

During the last 15 years I have taught students from 6 years old to 80 years old in schools (primary, secondary schools, high schools) and adult programs in three regions of Greece, I have participated in many seminars and conferences in person and at distance and I have collaborated in programs with teachers from Greece and Europe.

# Who will benefit from my policy?

---

Students of our region age 12 to 16 years old

All of us, because we will educate the future workforce to respond innovatively to real-world problems.

We need to invest in a way  
that makes sure we've got the  
workforce we need in the  
future.

~Jeanne Shaheen~

# What will the impact be?

---

The impact of School Career Guidance through STEAM will be that the future workforce will be well prepared for the challenges of the future.

## How much will it cost?

---

They may need a sum of around 100- 200 euro to cover stationery, coffee for guests, logistical infrastructure and other needs. (stationery, speakers of the fee of a national keynote speaker. The funds can come from the school budget or the PTA

# How much time will it take?

---

About one school year.

# What's the plan to overcome show-stoppers?

---

We will expose them to the advantages that exist and we will tell them that they will not change their course but the way they teach it and that they will get closer to the students.

We invest in things like the future, like our children, like education. In other words, we invest in things that we understand we will not see an immediate return of investment but everybody knows it will have a positive impact and you can easily measure it over the course of time. Your why is exactly the same thing.

— Simon Sinek —

AZ QUOTES

Tennessee's  
future  
workforce is  
growing

When we  
invest in  
children, we  
invest in our  
future.

Thank  
You
